

Limited Warranty

Every agricultural, off-the-road and material handling tire manufactured by GPX International Tire Corporation (GPX) bearing the Galaxy, Primex or Constellation name is warranted against defects in workmanship and material for the original usable tread depth (original tread depth less 2/32), limited to 60 months from date of purchase.

If an examination by GPX shows that any such tire became un-serviceable as a result of a workmanship or material related condition, it will, at the option of GPX, either be repaired at no charge or replaced charging the customer for tread wear, prorated by multiplying the original purchase price of the tire by the percentage of usable tread depth that has been worn from the tire. Costs of mounting, filling, and any other service charges or applicable taxes are payable by the customer.

A Galaxy branded tire will be replaced at no charge (excluding mounting and service charges) if a defect in the workmanship or materials is found within the first 25% of tread wear.

What is not covered.

- Tires purchased as seconds, mark downs, or used;
- Tire exhibiting field or road hazards including cuts, punctures, impact breaks and stubble damage;
- Failures due to improper mounting procedures, improper repairs, machine damage or spinning;
- Failures due to overloading or use at speeds in excess of the maximum recommended speed;
- Tires that have been run under inflated or over inflated;
- Tires mounted on rims which are not recommended by the Tire & Rim Association;
- Uneven or rapid wear due to mechanical irregularity of the vehicle;
- Damage resulting from fire, accidents, chemical corrosion or vandalism;
- Weather cracking or ozone damage on tires more than four years old;
- Tires that have been used in applications other than the application for which the tire was designed;
- Incidental or consequential damages.

GPX shall not be liable for any other warranty or representation of any kind, expressed or implied, without GPX's prior written agreement.
