

Multi Adjustable Torsion Axle*

Perfect for the torsion axle replacement market. Tie Down Engineering's Splined Torsion Axle combined with an adjustable mounting bracket. The ability to change arm angles and frame centers allows you to stock a small number of popular hub face specifications and be able to adjust the arm angle and the frame spacing.

Designed for single torsion axle replacements, the adjustable torsion offers the best features of our Eliminator axles with Quick Change spindles, stainless steel wear sleeves and Super Lube. The ride height is adjustable in 6 degree increments to cover every need.

- **Splined torsion arm allows for 6 degree incremental ride height adjustment**
- **Combination of inner and outer alignment bushings provide superior wheel toe and camber**
- **Eliminator spindles allow for quick wheel-end and spindle replacement**
- **Brackets are available for tube, I-beam and channel trailer frames**
