Power Hoist Capacity Chart

IMPORTANT: Because of variations in application, the data contained in these tables is provided as a general guide only.

Capacities are based on the following:

1. Water level non-diminishing load.
2. The vertical height between the rear hinge pivot and the floor is no less than 3 inches.
3. The hydraulic relief pressure is set at 3,200 psi.

PH310 Hoist Capacity (Tons)						
"A" Body (Feet)	"B" Overhang (Inches)	Dump Angle (Degrees) "M" Dimension (Inches)
